

Wire Straightening and Cutting Machine (8-14mm)

This wire straightening and cutting machine is engineered for high precision and efficiency in processing wire. It accurately straightens and cuts wire material, with adjustable settings to accommodate various wire specifications.

Product Overview

Industrial Wire Processing

The GT8-14A is a robust, high-performance wire straightening and cutting machine engineered for industrial precision. It handles metal wire with high efficiency, ensuring consistent length and straightness for construction and manufacturing applications. Featuring an advanced control system and a user-friendly interface, this machine minimizes downtime while maximizing productivity in demanding production environments.

Technical Specifications

Wire Diameter Range

8 mm

Minimum Diameter

14 mm

Maximum Diameter

Suitable Industries

Construction, Manufacturing, Metal Processing

Operational Features

Key Features

- Advanced control system for precise parameter adjustment
- User-friendly interface for simplified monitoring
- Robust construction for continuous industrial use
- Integrated emergency stop safety mechanism
