Product Overview

Professional Wire Tensioning Solution

This heavy-duty wire grip is engineered for the precise tensioning and securing of wire fencing across various professional applications. Featuring a robust metal construction with an advanced protective coating, it offers excellent durability and resistance against environmental corrosion. The integrated tightening mechanism, equipped with a rotating bolt and locking pin, ensures a reliable and secure hold for diverse wire gauges.

Technical Specifications

Protective Coating

Green protective finish • Corrosion resistant

Key Features

- Central tightening mechanism
- Rotating adjustment bolt
- Integrated locking pin
- Mounting hole for system integration

Construction Material

Galvanized steel

Applications

Suitable Applications

Wire fencing, Construction, Agricultural systems
