

Wired Computer Mouse with Scroll Wheel

This is a standard computer mouse with a two-button design and a scroll wheel. It connects via a wired interface and is ergonomically designed for right-handed users.

Overview

Reliable Wired Connectivity

This standard computer mouse offers a straightforward, plug-and-play solution for daily computing tasks. Featuring a clean white casing with a contrasting black base, it provides a professional aesthetic suitable for any office environment. The ergonomic design is specifically optimized for right-handed users, ensuring comfort during extended periods of use.
