Overview

Professional Discussion System

This wired conference microphone system is designed for fast, plug-and-play installation, making it ideal for small to medium-sized meeting venues. Featuring advanced digital audio processing and a built-in high-speed DSP, it ensures smooth and clear speech intelligibility. The system supports automatic USB recording, allowing for efficient audio meeting notes, and offers a compact, reliable form factor for daily use.

Key Features

System Highlights

Plug-and-Play, USB Recording, Digital Audio Processing, Compact Design, High-Speed DSP

Technical Specifications

Frequency Response	30Hz-20KHz
Sensitivity	-46dB ±4dB
Total Harmonic Distortion (THD)	0.3 %
Power Input	24V DC
Microphone Length	410 mm
Internal Loudspeaker	4 Ohm / 3W
Dimensions (W*D*H)	160 x 140 x 53 mm
Weight	0.75 kg

Environmental

Operating Temperature	0 to 45 °C
Storage Temperature	-20 to 50 °C

Package Contents

Standard Components

Component	Quantity
Congress server	1
Chairman unit	1
Delegate unit	1
Camera Dome	1
