

Wired Dynamic Microphone for Vocal and Instrument Use

This wired dynamic microphone is designed for vocal and instrument recording and live sound reinforcement. It features a robust construction and a cardioid polar pattern for focused sound capture.

Product Overview

Professional Dynamic Microphone

This wired dynamic microphone is engineered for versatile use in both vocal and instrument applications. Featuring a robust metal construction and a unidirectional polar pattern, it ensures focused sound capture while rejecting unwanted background noise. Its reliable design makes it an ideal solution for live stage performances, professional studio recording, and public speaking engagements.

Technical Specifications

Capsule Type	Dynamic
Polar Pattern	Uni-directional
Frequency Response	50Hz-15KHz
Output Impedance	600 Ω
Sensitivity	-75 \pm 3dB

Physical Properties

Body Material	Metal
Key Features	On/Off Switch, Durable Mesh Grille, Wired Connectivity
