

Wired Dynamic Microphone for Vocals and Instruments

This wired microphone is designed for vocal and instrument recording, as well as live sound reinforcement. It features a dynamic capsule for accurate sound reproduction and an integrated on/off switch for convenient control.

Product Overview

Professional Dynamic Microphone

The PT-759 is a versatile wired dynamic microphone engineered for both vocal and instrument applications. Its robust metal construction ensures long-lasting durability in professional environments. Featuring advanced audio companding technology, it delivers clear sound with reduced noise interference and an expansive dynamic range for high-quality audio reproduction.

Technical Specifications

Frequency Range	210-270MHz
Oscillation Circuit	Quartz crystal
Minimum Operating Voltage	3 V

Features

Key Features

- Cardioid polar pattern
- Balanced XLR output
- Integrated on/off switch
- Advanced audio companding
- Narrow-band frequency filtering

Capabilities

Vocal Recording, Instrument Recording, Live Sound, Podcasting, OEM Available
