

# Wired Dynamic Microphone for Vocals and Instruments

This wired microphone is designed for both vocal and instrument recording. It features a dynamic capsule with a cardioid polar pattern for sound isolation and feedback rejection.

## Product Overview

### Professional Performance

The PT-789 is a professional-grade wired microphone engineered for precision in both vocal and instrument recording. Built with a robust metal chassis, it is designed to withstand the rigors of live performances, studio sessions, and demanding public speaking environments. Its dynamic cardioid capsule ensures superior sound isolation and reliable feedback rejection, delivering a clean and clear signal every time.
