

Wired Dynamic Microphone with Cardioid Polar Pattern

This wired microphone is designed for recording vocals, instruments, or live sound reinforcement. It features a dynamic capsule with a cardioid polar pattern for excellent feedback rejection and clear sound capture.

Product Overview

Professional Wired Dynamic Microphone

This wired dynamic microphone features a uni-directional cardioid polar pattern, making it an excellent choice for vocal performance and live sound reinforcement. The unit is constructed with a durable plated metal body, ensuring long-term reliability in demanding environments. Equipped with an integrated on/off switch, it provides professional control for public speaking, karaoke, and recording applications.
