

Wired Optical Computer Mouse

This is a standard ergonomic optical computer mouse designed for comfortable and precise navigation. An optical sensor ensures accurate tracking on a variety of surfaces.

Product Overview

Ergonomic Performance

This wired optical computer mouse is engineered for comfort and precision in professional environments. Its streamlined, ergonomic shape is designed to fit the hand naturally, significantly reducing strain during long periods of use. With reliable wired connectivity and an accurate optical sensor, it provides consistent performance across a variety of surfaces.
