

Wired Optical Computer Mouse

This is a standard optical mouse featuring a two-tone design with a red top and black base. It includes a scroll wheel and a wired connection.

Overview

Reliable Wired Optical Mouse

This standard optical mouse is designed for consistent performance in general computer environments. Featuring a comfortable, ergonomic shape and a high-precision optical sensor, it ensures smooth tracking on a variety of surfaces. The wired connection provides a dependable, lag-free experience, making it an ideal choice for office workstations and daily computing tasks.
