

Wired USB Computer Mouse

This is a standard wired computer mouse with an ergonomic design. It includes left and right click buttons, a scroll wheel, and a wired USB connection.

Product Overview

Ergonomic Wired Connectivity

This standard wired computer mouse is designed for consistent performance and ease of use in professional office environments. Its classic ergonomic shape ensures comfort during extended periods of navigation, while the reliable USB wired connection eliminates the need for batteries. Featuring a precision scroll wheel and responsive click buttons, this model provides a straightforward solution for daily computing tasks.
