

Wired USB Optical Mouse

This optical mouse is a precision input device for accurate navigation. It features an ergonomic design and connects via a wired USB interface for a stable connection.

Overview

Reliable Optical Navigation

This wired optical mouse is designed for precision and comfort, making it a reliable choice for daily desktop or laptop use. Featuring an optical sensor for accurate tracking on various surfaces, it offers a plug-and-play experience without the need for complex driver installations. The ergonomic build ensures comfort during extended work sessions, while the standard button layout supports efficient navigation.
