

Wired USB Optical Mouse

This optical mouse is a precision input device for accurate navigation. It uses optical tracking technology to deliver smooth cursor control on various surfaces and has an ergonomic design for comfortable, extended use.

Product Overview

Precision Wired Optical Mouse

This wired optical mouse features a unique transparent casing that showcases its internal components while delivering reliable performance. Designed for precision, it offers responsive cursor control with 800 DPI resolution, making it suitable for standard office and home computing tasks. Its ergonomic 3D button configuration ensures ease of use, while the durable construction supports up to 3 million keystrokes for long-term reliability.

Technical Specifications
