

Wireless ADSL Router

This wireless router is compliant with IEEE 802.11n and backwards compatible with 802.11b/g. It integrates an ADSL2/2+ modem, wireless router, wireless access point, four-port switch, and firewall into one device.

Product Overview

High-Performance Connectivity Solution

The JWS-530TN is a high-performance wireless router engineered specifically for home and small office environments. Designed with dual antennas, it delivers enhanced signal strength and superior coverage across your workspace. Its compact form factor ensures easy placement, while integrated LED indicators provide real-time status updates for quick troubleshooting.
