

Wireless Charger for Barcode Scanners

This wireless charger is designed for use with long-distance wireless bar code scanners. It adjusts the charge current automatically according to the loading conditions and includes object detection and overload protection with thermal protection.

Product Overview

Advanced Wireless Charging Solution

This wireless charger is specifically engineered for high-performance long-distance barcode scanners. It features intelligent charge current adjustment based on real-time loading conditions, ensuring optimal battery longevity. Designed for demanding retail and logistics environments, the unit incorporates advanced object detection and comprehensive thermal and overload protection for safe, reliable operation.

Technical Specifications

Compatible Scanner Models

- XL9300
- XL9309

Safety Protections

Overload Protection, Thermal Protection, Object Detection

Charging Method

Intelligent Wireless Adaptive Charging

Operational Details

Application Fields

Retail • Warehousing • Logistics
