Product Overview

Versatile Fast Wireless Charging Solution

This premium zinc alloy wireless charger pad is designed for high-efficiency power delivery to Qi-enabled mobile phones and TWS earbuds. Its unique foldable design allows for charging two devices simultaneously in the open state or a single device when folded, providing maximum flexibility for your workspace. Built with integrated safety features like air vents for heat dissipation and anti-slip rubber padding, it ensures a stable and secure charging experience for all your professional mobile devices.

Technical Performance

Charging Performance

5 V Input Voltage	2 A Input Current	1 A Output Current
-----------------------------	-----------------------------	------------------------------

Standards & Compatibility
