

Wireless Charging Car Phone Holder with Suction Cup Mount

This car phone holder allows users to wirelessly charge compatible devices while driving. It features a suction cup base for secure mounting and adjustable arms to accommodate different phone sizes.

Product Overview

Convenient Wireless Charging & Mounting

This wireless charging car phone holder combines secure mounting with efficient power delivery. Designed for ease of use, it features auto-lock and release functionality via gravity linkage, allowing for simple single-handed operation while driving. With adjustable telescopic arms and a 180-degree pivot, it ensures optimal viewing angles for a wide range of smartphone devices.

Charging Performance

Charging Specifications

83 % Max Efficiency	8 mm Transmission Distance	110 kHz Frequency Range
-------------------------------	--------------------------------------	-----------------------------------

Power Output

- DC 5V / 1.5A
- DC 9V / 1.1A

Device Compatibility

Supported Device Sizes	4.7 to 6.0 inches
Supported Width	60mm to 85mm

Mechanical Features

Telescopic Arm Range	88mm to 128mm
Pivot Angle	180 degrees

Safety & Indicators

Safety Protections	Over Current Protection, Over Voltage Protection
LED Indicator	Yes
