

Wireless Charging Dock for iPhone

This product is a wireless charging dock designed for iPhones. It supports charging via a power adapter and features an indicator light.

Product Overview

Wireless Charging Dock Solution

This wireless charging dock provides a convenient and sleek power solution for compatible iPhones. The unit features automatic device detection and clear dual-color LED indicators to communicate charging status efficiently. Designed for reliable daily use, it connects seamlessly to standard 110-240V power supplies via a dedicated DC12V adapter.
