

# Wireless Charging Phone Stand with LED Lamp

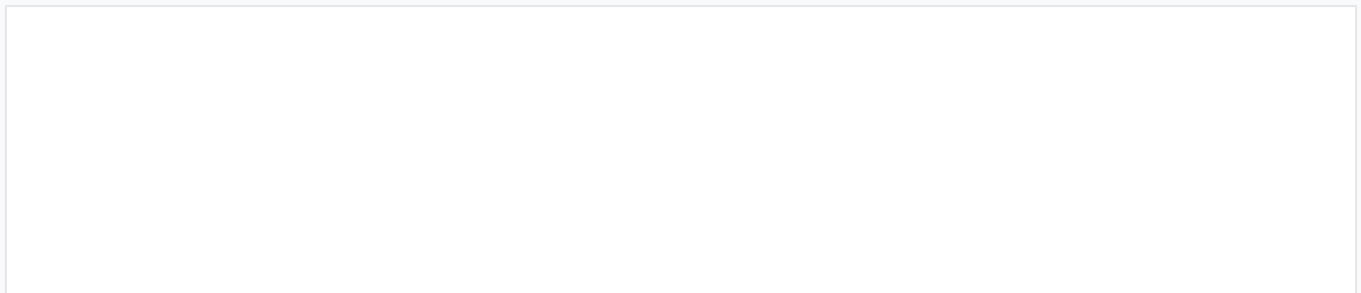

This patented phone stand features a built-in wireless charger for convenient use at home or the office. It also includes a three-brightness LED light that can be used as a night lamp.

## ADDITIONAL IMAGES

## Overview

A versatile wireless charger that functions as a night lamp with multiple charging orientations.

### Dual-Purpose Charging Solution

This unique, patented wireless charging stand combines high-efficiency power delivery with a built-in LED lamp for versatile use at home or in the office. It features an adjustable viewing angle from 65° to 85° and supports both vertical and horizontal charging positions to suit your workspace. Designed for convenience and safety, it includes intelligent protection against overheating and over-charging while remaining compatible with phone cases up to 8mm thick.

## Technical Specifications

### Key Performance Metrics

<b>10 W</b> Max Output	<b>75 %</b> Charging Efficiency	<b>8 mm</b> Charging Distance
---------------------------	------------------------------------	----------------------------------

### Input Specifications

DC5V / DC9V, 1.5A - 2A

## Features

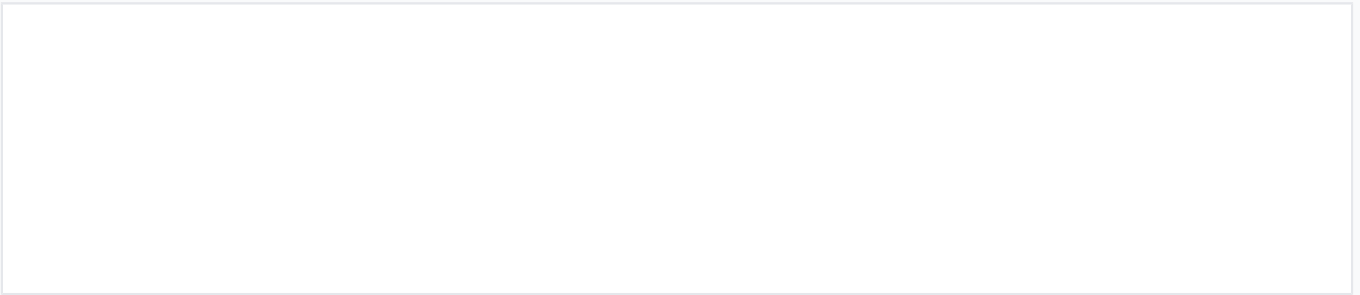

Easily adjust the viewing angle and switch LED light modes with a simple touch.

### Core Features

- Integrated LED night lamp with 3 brightness settings
- Adjustable viewing angle (65°-85°)
- Supports vertical and horizontal charging
- Foreign object detection
- Over-heating and over-charging protection

## Physical Properties

The adjustable phone holder accommodates various smartphone sizes for a secure fit.

<b>Dimensions</b>	143 x 134 x 69 mm
