

Wireless Door Chime

This wireless door chime offers easy installation without any wiring. It has a 50m range and a rainproof push button transmitter.

Product Overview

Versatile Wireless Doorbell System

This wireless chime system offers a simple and reliable solution for entrance alerts, room-to-room communication, or accessibility support for those in beds or wheelchairs. Designed for easy installation, the unit requires no complex wiring and is fully compliant with low-power radio standards. With a durable, rainproof push-button transmitter and a versatile 50-meter range, it provides a dependable alerting mechanism for various residential and commercial environments.
