

Wireless Geological Data Terminal with QW-ERTY Keypad

This wireless terminal features a BlackBerry-style UI class and a full keyboard. It is equipped with DTV and a 10PIN USB interface.

Product Overview

Rugged Geological Data Terminal

The Q518 is a professional-grade wireless terminal engineered specifically for data acquisition in demanding geological exploration environments. It combines a tactile QWERTY keypad for precise field entry with a high-resolution display for immediate data visualization. Designed for durability, this instrument ensures reliable performance and extended operational autonomy in remote locations.

Technical Specifications

Input Interface	QWERTY Keypad
Wireless Connectivity	Yes
Environmental Resilience	Ruggedized Construction, Field-Ready

Operational Capabilities
