

Wireless GSM Intercom System with Two-Way Audio

This system provides secure and convenient communication. It features a durable outdoor station with a call button, speaker, and microphone for clear two-way audio.

Product Overview

Professional Wireless GSM Intercom

This wireless GSM intercom system offers a secure and flexible communication solution for both residential and commercial properties. By utilizing GSM connectivity, it eliminates the need for complex, extensive wiring during installation. The system includes a robust outdoor station equipped with a call button, high-quality speaker, and microphone, ensuring clear two-way audio communication for enhanced security and accessibility.

Technical Features

Connectivity	Wireless GSM
Audio System	Two-Way Audio, Integrated Microphone, Integrated Speaker
Installation	Wireless (No extensive wiring required)

Application

Usage Environment

Residential • Commercial

Primary Advantages

- Simplified installation process
- Enhanced security monitoring
- Convenient remote communication
- Durable outdoor construction
