

Wireless Infrared Heating Massage Pillow

This wireless massage pillow utilizes rotating massage nodes to simulate a kneading massage. The infrared heating function enhances the massage experience by promoting blood circulation and further relaxing muscles.

Product Overview

Professional Wireless Shiatsu Massage Pillow

The FR-P29 Portable Shiatsu Massage Pillow is designed to provide targeted relief to aching muscles using rotating nodes and infrared heating technology. Its ergonomic structure makes it ideal for neck, shoulder, and back support, while the cordless design ensures maximum portability for office, home, or travel use. Featuring an automatic 15-minute shut-off safety function, it offers a secure and professional-grade relaxation experience.
