

Wireless Interconnected Smoke Detector Set

This set features interconnected wireless smoke detectors for enhanced fire safety. When one detector senses smoke, all interconnected detectors sound an alarm, providing early warning throughout the premises.

Overview

Comprehensive Fire Safety Solution

This wireless interconnected smoke detector set provides an advanced safety solution for residential and commercial environments. Designed for seamless communication, the system ensures that if one unit detects smoke, every interconnected device triggers an alarm simultaneously. This synchronized response provides critical early warning across the entire premises, enhancing overall safety and response time.

Key Features

Safety Indicators

- Test button for functionality checks
- Low battery indicator

Connection Type

Wireless Interconnected

Suitable Applications

Residential, Apartments, Commercial Buildings

Device Details

Model Number

KD-101LD
