Product Overview

Wireless Magnetic Switch Sender

This wireless magnetic switch sender is a reliable component designed for security systems and automation applications. It effectively detects the opening or closing of doors and windows by monitoring changes in the magnetic field. With a compact design and wireless transmission capabilities, it offers easy installation and seamless integration into existing security setups.

Technical Specifications

Operation Frequency	433.92 MHz
Range	40 m

Power & Battery

Power Supply	1 x CR2450 3V DC
Battery Lifetime	Approx. 1 year

Compliance & Certification

Certifications

CE • RED Certified
