

Wireless Parking Sensor System with LCD Display

Wireless parking sensor system with 5-color backlight LCD display. It provides audible and visual alerts to assist with parking.

Product Overview

Smart Parking Assistance

This wireless parking sensor system is designed to significantly enhance driver safety and vehicle protection during parking maneuvers. Featuring an intuitive 5-color backlight LCD display, it provides both clear visual and audible alerts to notify the driver of surrounding obstacles. The wireless installation architecture offers flexible placement options, making it a highly adaptable solution for various vehicle models.
