Product Overview

Advanced Wireless Smoke Detection

The TSS380D-HR is a high-performance photoelectric smoke alarm designed for early detection of low-energy smoke particles. Featuring a sealed 10-year lithium battery, this device eliminates the need for battery replacements, ensuring long-term reliability. With integrated RF433MHz wireless interconnection capabilities, it supports linking up to 40 units for comprehensive home or facility safety.

Technical Specifications

Sensor Technology	Photoelectric
Battery Life	10 years
Interconnection Capacity	40 units
Wireless Frequency	RF433MHz

Features & Compliance

Core Features

- Hush function (8 mins silence time)
- Automatic dust compensation
- Twist-on base for easy installation
- Large Test/Hush button
- Alarm ramp up in Test mode
- Integrated piezoelectric sounder

Certifications	EN14604:2005, NF, CCC, Q
Warranty	5 years
