

Wireless Remote Control Lamp Socket

This remote control lamp socket features an E26 connection. It allows the user to remotely control compatible lamp sockets individually from up to 100 feet away through walls and other barriers.

Product Overview

Smart Wireless Lighting Control

This wireless remote control lamp socket system offers a convenient solution for managing home or office lighting without complex electrical installations. With self-learning pairing capabilities, users can easily match transmitters to multiple lamp holders for seamless operation. Designed for versatility, the system allows individual control over three separate lamp holders, including remote operation through walls and furniture.

Technical Specifications

Input Voltage	120 V
Operating Frequency	433.92 MHz
Socket Base	E26
Maximum Load	60 W
Operating Distance	100 ft

Key Features

Control Features	Self-Learning, Through-Wall Signal, Individual Control, Power-Out Safety Mode
