

Wireless Security Camera System with Four Cameras

This wireless security camera system features a central monitoring unit with a display showing feeds from four wireless cameras. The system includes cameras with antennas and adjustable stands for flexible placement.

System Overview

Wireless Surveillance Solution

The RL-4DVR wireless security camera system provides a comprehensive monitoring solution for up to four distinct sites simultaneously. Featuring a 7-inch TFT display, this system utilizes 2.4GHz digital signal transmission with built-in anti-interference technology for reliable connectivity. Designed for ease of use, it supports DIY installation and replaces traditional DVR setups with convenient SD card recording.

Camera Capacity	4 units
