

Wireless Security Camera System with Monitor

This wireless security camera system features a central monitor to display feeds from multiple cameras. Wireless connectivity allows flexible camera placement without extensive wiring.

System Overview

Professional Wireless Surveillance Solution

This wireless security camera system provides a comprehensive monitoring solution for various environments, featuring a central 7-inch TFT display monitor. The system supports simultaneous viewing of up to four sites, ensuring complete situational awareness without the need for complex wiring. With built-in Wi-Fi, users can easily access remote monitoring via mobile devices, while advanced features like auto-motion recording and anti-interference technology ensure reliable operation.
