

Wireless Security Surveillance System with Four HD Cameras

This comprehensive security system features four high-definition cameras with wireless connectivity. It includes a network video recorder for continuous recording and supports remote access for monitoring from anywhere.

System Overview

Professional Wireless Surveillance Solution

This comprehensive 4-channel wireless security surveillance system is designed for robust monitoring in both indoor and outdoor environments. Featuring high-definition 1080P resolution and advanced H.265 video compression, it ensures clear footage while optimizing storage efficiency. The system includes a reliable NVR capable of supporting up to 8TB of storage, providing a scalable solution for continuous recording needs.

Channel Capacity	4 Channels
------------------	------------

Camera Specifications

Resolution	2MP 1080P
Image Sensor Chipset	SSC325+GC2053

Recording & Storage

Video Compression	H.265
NVR Processor	Hi3536DV100
Storage Interface	1 SATA
Maximum HDD Capacity	8 TB

Installation & Environment

Connectivity Type	Wireless, Ethernet
Environment Suitability	Indoor, Outdoor
