

Wireless Security Surveillance System

This wireless security system includes a network video recorder and four wireless security cameras. It supports remote viewing, high-definition video, and infrared night vision.

System Overview

Comprehensive Wireless Surveillance Solution

This professional-grade surveillance system offers high-definition 3MP monitoring with advanced H.265 compression for optimized bandwidth and storage. Featuring a dedicated wireless module, the system ensures strong signal stability and eliminates the need for complex network cabling. With IP66 weatherproofing and integrated audio recording, it provides reliable, real-time security monitoring for indoor and outdoor environments via mobile or PC.

Key Features

Wireless Connectivity, H.265 Compression, IP66 Waterproof, Motion Detection, Remote Access
