Product Overview

All-in-one wireless solar camera system for various outdoor environments.

All-in-One Solar Security Solution

This advanced wireless security camera integrates solar power and LED lighting into a single, durable outdoor device. It features full 1080P HD resolution for clear color images both day and night, powered entirely by renewable solar energy. Designed for flexibility, it supports remote monitoring via a dedicated mobile app and provides comprehensive storage options including local SD card and cloud integration.

Technical Specifications

Video Resolution	1080P Full HD (1920x1080)
Image Sensor	Sony IMX 323 CMOS
Frame Rate	30 fps

Connectivity & Storage

Network Compatibility	4G LTE-TDD, 4G LTE-FDD, TD-SCDMA, WCDMA, CDMA EVDO
Max SD Card Capacity	64 GB

Features

Advanced Capabilities

- Solar-powered wireless operation
- PIR motion detection
- Integrated motion-activated lighting
- Two-way audio communication
- Real-time app notifications
- Full-color day & night imaging

Installation & Durability

Ingress Protection

IP65 Waterproof

Mounting Methods

Wall Mount, Pole Mount
