

# Wireless Solar-Powered Video Door Phone Kit

This video door phone kit has a high-resolution camera for clear video calls. It includes a solar panel for continuous operation and supports wireless connectivity for easy installation.

## Product Overview

### Sustainable Smart Access

The Wireless Solar-Powered Video Door Phone Kit offers a sophisticated solution for remote visitor management through integrated WiFi connectivity. By leveraging solar energy, the system ensures continuous operation and simplified installation without the need for complex wiring. Users can monitor outdoor areas, engage in two-way intercom communication, and remotely unlock doors directly from their mobile devices.

## Technical Specifications

### System Capabilities

- Remote video monitoring
- Two-way intercom communication
- Remote door unlocking
- Mobile phone integration

Connectivity	WiFi
Power Source	Solar Energy

## Applications

Suitable Environments	Residential, Commercial
