

Wireless Video Door Phone with Image Capture

This wireless video door phone facilitates dual communication, monitoring, and remote door release. It captures images and video, storing them on a 1GB memory card.

Product Overview

Advanced Security Access

This wireless video door phone system provides a convenient and secure way to monitor and control access to your property. Designed for reliability, the system features a wireless monitor and a weatherproof outdoor station with high-resolution imaging. It allows for remote visitor identification, two-way communication, and remote access control, ensuring enhanced security for any facility.

Technical Specifications

Certifications	CE, RoHS, FC
