

Withdrawable Switchgear - Medium Voltage Power Distribution

This medium-voltage power distribution unit is designed for indoor applications. It features vacuum circuit breakers for reliable protection and control of electrical circuits.

Product Overview

KYN28A-12 Medium Voltage Switchgear

The KYN28A-12 is a high-performance withdrawable switchgear designed for medium voltage power distribution systems. It is engineered for use in single busbar and single busbar sectionalized power systems, supporting three-phase AC 50Hz operations. This unit provides reliable power receiving and distribution control for critical infrastructure, including power plants, substations, and industrial facilities.

Technical Specifications

Rated Voltage	12 kV
Rated Frequency	50 Hz
System Compatibility	Single Busbar, Single Busbar Sectionalized

Design & Features

Key Features

- Withdrawable design for easy maintenance
- Modular configuration
- Vacuum circuit breaker integration
- Indoor application suitability

Applications

Common Applications

Power Plants • Substations • Industrial Facilities • Commercial Buildings
