

WM400 Agricultural Tilling Machine

This agricultural tilling machine is designed for soil preparation and cultivation. It features adjustable tilling depth and width for different farming needs.

Product Overview

Professional Soil Cultivation

The WM400 Tilling Machine is a robust and efficient agricultural tool engineered for precision soil preparation. It features an adjustable tilling depth and width, providing the versatility required for diverse farming applications. Designed for reliability and consistent performance, this machine enhances overall farm productivity and improves crop yields.

Operational Features

Tilling Features

- Adjustable tilling depth
- Adjustable tilling width
- Durable heavy-duty tines
- User-friendly control system

Safety Compliance

Engine Kill Switch, Protective Guards

Suitability

Farm Suitability

Small Farms • Medium Farms • General Cultivation
