Product Overview

High-Performance Woodworking Solution

This professional-grade auger drill bit is engineered for efficient drilling in both soft and hard wood types. Featuring a self-feeding screw point, it ensures effortless starting and precise hole placement without vibration. The optimized no-axis flute design facilitates rapid chip removal, preventing clogging and enhancing overall drilling speed for demanding carpentry and construction applications.

Technical Specifications

| | |
|--------------|--------------------------------|
| Material | C45 Carbon Steel |
| Shank Design | Hexagonal |
| Center Point | Self-feeding screw point |
| Flute Design | No-axis flute for chip removal |

Applications

Ideal For

Carpentry • Woodworking • Construction

Compatible Materials

Soft Wood, Hard Wood
