

Wood Bead Forming and Sanding Machine

This woodworking machine is designed for crafting and sanding wooden beads. It features a robust frame, a headstock with a chuck for holding the workpiece, and a tailstock for support.

Product Overview

Professional Bead Crafting Solution

This specialized woodworking machine is engineered for the precise forming and sanding of wooden beads. Featuring a robust frame construction, it includes a dedicated headstock, chuck, and tailstock assembly to ensure workpiece stability. The integrated tool rest allows for accurate manual shaping and consistent sanding finishes, making it an ideal choice for professional woodworking environments.

Technical Specifications

Model ID	KC120
Power Source	Electric Motor

Key Features

Included Components

- Robust frame
- Headstock with chuck
- Tailstock for support
- Precision tool rest
- Integrated control panel

Application

Ideal For	Professional Woodworking, Bead Manufacturing, Sanding, Shaping
