

Wood Chipper

The Wood Chipper is a robust machine designed for processing branches and woody materials. It is suitable for landscaping, forestry, and yard maintenance.

Product Overview

High-Efficiency Wood Processing

The WCL5 wood chipper is a robust, PTO-driven machine engineered for efficient processing of branches and woody materials. Designed to handle up to 5-inch diameter limbs, it delivers a consistent throughput of 6-7 cubic meters per hour. Its compact yet sturdy design ensures reliability for professional landscaping, forestry, and estate maintenance applications.

Technical Specifications

Max Chipping Diameter

127 mm

Chipping Capacity

Performance Metrics

Metric	Value
Working Efficiency	6-7 m ³ /h
PTO Turning Speed	540 r/min
Required Tractor Power	20-30 hp

Mechanical Configuration

- Structure Weight: 180kg
- Flywheel Blade Size: 180mm
- Number of Flywheel Blades: 2

Application

Recommended Use

Landscaping, Forestry, Yard Maintenance
