Product Overview

Versatile Wood Processing & Transport

This robust wood chipper mounted on a mini dumper platform offers a highly efficient solution for landscaping, forestry, and agricultural needs. Designed for demanding environments, it combines a powerful 9HP engine with a durable chipping mechanism and mobile dumper base. The integrated design reduces manual labor by facilitating both wood processing and material transport in a single, compact unit.

Technical Specifications

Engine Power

9 HP

Horsepower

270 cc

Displacement

Fuel Type

Gasoline

Blade Quantity

3

Dimensions & Capacity

Funnel Size

35 x 25 cm

Physical Properties

Machine Weight

135 kg

Operations

Input Method

Manual

Output Method

Fan

Applications

Recommended Applications

Landscaping, Forestry, Agriculture, Tree Care
