

Wood Drill Bit

This wood drill bit is designed for clean and accurate hole drilling in various wood types. Its high-speed steel (HSS) construction ensures durability and a long tool life.

Product Overview

Precision Wood Working Drill

This precision-engineered wood working drill bit is specifically designed to deliver clean and accurate holes across various wood types. Featuring a specialized brad point tip, it ensures precise centering and significantly reduced splintering for professional-grade finishes. Crafted from high-speed steel (HSS), the tool offers exceptional durability and extended service life for rigorous woodworking tasks.

Technical Details

Material	High-Speed Steel (HSS)
Key Features	Brad point tip, Precision centering, Anti-splinter design, Secure shank grip

Applications

Primary Applications

- General woodworking projects
- Furniture making
- Cabinet construction
