

Wood-Edged Table for Textile Machinery

This wood-edged table is used in apparel or textile machinery. It features a light-colored surface with a visible wood edge, a metal mounting bracket, and a slot cut into the surface.

Product Overview

Professional Textile Machinery Table

This wood-edged table is a precision-engineered component designed for integration into textile and apparel machinery environments. Its multi-layered construction ensures durability, while the integrated mounting bracket and surface slot facilitate seamless installation into existing production systems. It offers a reliable and smooth workspace for demanding textile processing applications.

Physical Characteristics

Surface Material	Multi-layered composite
Edge Construction	Wood-edged finish

Technical Integration

Application Textile Machinery • Apparel Manufacturing	
Mounting Features	Metal bracket, Integrated slot
