

Wood Hole Saw Kit

This hole saw kit is designed for cutting circular holes in wood. It includes multiple hole saws of varying diameters, along with an arbor and pilot drill bit for precise and efficient hole creation.

Product Overview

Professional Wood Hole Saw Kit

This versatile hole saw kit is engineered for precision and efficiency when creating circular holes in wood surfaces. Featuring hardened steel teeth, the saws are built for durability and clean cutting performance, making them an essential tool for woodworking, electrical installations, and general DIY projects. The set includes a comprehensive range of diameters, complete with an arbor and pilot drill bit for immediate use.

Technical Specifications

Included Components

- Multiple hole saws (varying diameters)
- Arbor
- Pilot drill bit

Material	Hardened Steel
Primary Applications	Woodworking, Electrical Installation, DIY Projects

Performance Features

Performance Highlights

Hardened Steel Teeth • Clean Cut Finish • High Durability
