

Wood Moisture Meter with Dual Pins

This compact and portable instrument measures the moisture content of wood. It features dual pins for accurate readings and a clear digital display showing the moisture percentage.

Product Overview

Professional Wood Moisture Analysis

The Wood Moisture Meter with Dual Pins is a compact and portable instrument designed for precise moisture content measurement in various wood types. Featuring dual-pin technology and a clear digital display, it provides reliable readings essential for woodworking, construction, and forestry projects. This tool ensures you can verify optimal wood conditions quickly and accurately to prevent warping or structural issues.

Technical Specifications

Model Number	MD-4G
Measurement Method	Dual-pin contact
Display	Digital LCD

Features

Key Features	Portable, Dual-pin sensors, Digital readout, Hold function
--------------	--

Applications

Ideal For

- Woodworking
- Construction
- Forestry
