

Wood Rasp Plane Tool

This wood rasp plane features a non-clogging cheesegrate design. Its hardened, razor-sharp construction makes it suitable for use on soft materials such as wood, lead, aluminum, and fiberglass.

Product Overview

Professional Rasp Plane Tool

This versatile wood rasp plane features a unique non-clogging cheesegrate design, engineered for efficient material removal. The hardened, razor-sharp surface is perfectly suited for working with a variety of soft materials including wood, lead, aluminum, and fiberglass. Its durable construction ensures consistent performance across diverse professional applications.
