

Wood Shaping Adze with Angled Blade

This hand tool features a blade set at a right angle to the handle. It is designed for shaping wood by striking or carving.

Product Overview

Professional Wood Shaping Adze

This wood shaping adze is a specialized hand tool designed for efficient material removal and timber shaping. Featuring a durable metal blade set at a right angle to the handle, it is ideal for tasks such as hollowing out wooden vessels or carving timber. Its robust construction makes it a reliable choice for woodworking professionals and traditional craft applications.
