

Wood Spade Drill Bit

Wood spade bits are made of high carbon steel. Application is for drilling holes in wood.

Product Overview

Professional Wood Spade Drill Bits

These high-carbon steel spade bits are engineered for rapid and efficient hole drilling in various wood types. The wide paddle design optimizes chip evacuation, ensuring clean cutting performance for professional woodworking applications. With a wide range of available diameters, these bits offer the versatility required for diverse construction and carpentry projects.

Technical Specifications

Available Individual Sizes

- 6mm
- 8mm
- 10mm
- up to 55mm

Material Composition	High Carbon Steel
----------------------	-------------------

Set Availability	10mm to 25mm
------------------	--------------

Applications

Primary Application	Woodworking, Carpentry, Hole Drilling
---------------------	---------------------------------------
