Product Overview

Sustainable Wood Drying Solution

This industrial-grade wood waste burning dryer machine is engineered to streamline wood drying processes while minimizing operational costs. By utilizing wood waste as a primary fuel source, it offers a sustainable and environmentally conscious solution for lumber yards, woodworking shops, and furniture manufacturers. The robust construction features a large-capacity drying chamber designed for efficient moisture removal and consistent performance.

Technical Specifications

Drying Method	Wood waste combustion heating
Chamber Construction	Insulated Panels, Corrugated Metal, Large Capacity
Access System	Double door system for secure operation and easy access
Airflow & Ventilation	Yes

Operational Features

Operational Highlights

1 Wood Waste
Fuel Source

Control & Maintenance

- Integrated control panel
- Tall chimney for efficient smoke exhaust
- Maintenance access ladder
- Combustion chamber access door
