

Wooden Garden Thermometer

This traditional garden thermometer is constructed from wood. It displays temperature in both Celsius and Fahrenheit, with a red liquid indicator.

Product Overview

Classic Wooden Garden Thermometer

This traditional wooden garden thermometer offers a simple and reliable way to monitor ambient temperatures in both indoor and outdoor environments. Crafted from durable pine wood, its classic design ensures it blends seamlessly into garden settings or home interiors. The device features a clear, easy-to-read scale, providing precise temperature tracking for various professional and personal applications.
